DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

paragraph 32, line 1, "energized again the cam, follower pin 48" is unclear.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With respect to claim 1, from which claim 6 depends, no first direction is defined.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Wilkes (US 5037145).

An actuator including a motor 452 operable to move an output member 424, the actuator further including a shuttle 436 and a camming arrangement 44 axially movable relative to each

Art Unit: 3683

other to provide rotational indexing of the shuttle and the coming arrangement relative to each other, so that different output positions of the output member are provided for.

Re claim 2, see worm screw 420.

Re claim 3, see gears 454.

Re claim 5, see Figure 2.

Re claim 7, see Fig. 5

Re claims 8-12, see Figs. 3a to 3d.

Re claims 16-17, see Fig. 8.

Re claims 18-21, see the abstract.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wilkes in view of Bridgeman et al. (US 5722272).

Wilkes does not disclose a centrifugal clutch on the motor. Bridgemen et al. disclose a centrifugal clutch in a lock environment. It would have been obvious to one of ordinary skill in the art to which the invention pertains at the time the invention was made to have provided Wilkes with a centrifugal clutch according to the teachings of Bridgeman et al. in order to allow the motor to spool up before the lock is engaged.

Allowable Subject Matter

6. Claims 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wilkes et al. ('377), Kobayashi, Kachouh, Feder ('676 and '393), Ohta, Rogakos et al., Fry et al., Vergin, Schlagwein, Franz, Bross, Johmann, and Bartel et al. disclose related devices.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin A Pezzlo whose telephone number is (703) 306-4617. The examiner can normally be reached on M-F 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Lavinder can be reached on (703) 308-3421.
